Dear Parents and Guardians,

Replacing and repairing the gas lines of the town is a large undertaking that will take time to complete.

The transportation department is working together with the town, the police department, gas companies, and your students' school to provide uninterrupted bus service. The police department and gas company has made it a priority to allow buses to travel through construction areas when it is safe to do so. While we make every effort to adapt to the daily changes during this restoration, there will be occasions where route changes are necessary and immediate.

Please monitor your area; if your road is not passable for the school bus, meet the bus at the end of your street or go to the next accessible bus stop on your route. All buses routes can be found on the transportation page of the [APS website](#).

Bus drivers will make every attempt to run bus service at the same punctual times, but road work could cause delays on some routes. The town's [website](#) also updates information on a regular basis regarding restoration efforts, construction work and street closings.

We appreciate your cooperation and continued patience as the work for full recovery continues.

Mary Lu Walsh

Transportation Coordinator
